

Sulawesi Indonesia

Lembah Straits

&

Siladen Island

Oct 22*-Nov 10, 2019

Sulawesi (formerly *Celebes*) is one of the main islands of Indonesia. This enormous island has much to offer the visitor from extraordinary unique cultures, to an under-explored mountainous region, and several truly world class diving spots. Lembah is a true macro photographers paradise and is famous for its "muck diving" on black volcanic sand. Muck diving is all about spotting weird and wonderful critters. Two of the most famous dives sites called "hairball & aw shucks, are the house reef at ***Dive into Lembah Resort***. There is also reef diving available for those who would like a change of scenery.

Siladen Resort & Spa is an exclusive boutique dive resort located on Pulau Siladen, a lush tropical island in the heart of the Bunaken National Marine Park. The property is located on the western side of the island on a 300 meters long stretch of white coral reef beach facing the Manado Tua volcano. The Marine Park is known for its rich macro life and is mostly characterized by wall dives rich in hard and soft corals. Pelagics such as reef sharks (black tip, white tip), eagle rays, barracudas, tuna, and turtles are also a common sight. All reefs around the islands are suitable for snorkeling as they come up as shallow as 3m in depth.
