

BONAIRE

The Netherlands Antilles

February 19-26, 2022

Bonaire is the Eastern-most Caribbean island in the "ABC" island chain, made up of Aruba, Bonaire and Curacao. Located in the Netherlands Antilles (often called the Dutch Caribbean), the island is a mere 40 miles north of Venezuela. Bonaire covers 112 square miles, is 24 miles long and 3 to 7 miles across. Long known as one of the Caribbean's most outstanding dive destinations, Bonaire has something for everyone. Beautiful shallow coral gardens teeming with brightly colored fish life. Dramatic walls of hard and soft corals. A large variety of unusual marine life such as the timid seahorse and the almost impossible to see frogfish. The shore diving in Bonaire is plentiful and easily accessible, allowing the most avid divers the opportunity to do as much diving as they want. When not diving, enjoy several top side attractions such as; hundreds of pink flamingos roaming wild, dramatic desert landscapes, picturesque villages, charming people and even a pink beach. For the less active, you can hang out by the one of the hotel's fresh water pools and sip a drink with an umbrella. Whatever your interests - Bonaire will not disappoint!
