

# Papua New Guinea

## Highlands Experience

**November 12-17, 2025**

The Highlands of Papua New Guinea were only discovered in the 1930's, before which the fierce warrior tribes of the Highlands regions had lived undisturbed for thousands of years. Today the

people of these areas dance on the edge of two worlds, the complex tribal traditions that govern their daily lives and the increasing influences of the modern world. These friendly mountain people still primarily live as subsistence farmers in the villages that surround the small cities of Mount Hagen and Tari. We will have an opportunity to visit these Highlands villages and encounter the ancient cultures of the Melpa and Huli tribes as well as exploring the extremely rich plant and bird life of the PNG Highlands.
